

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

May 1, 1997

LB 306

SENATOR VRTISKA: I understand that. But my concern is, is the oversight that you've been talking about, and it appears to me that the oversight, if you, if you exceed the \$1.10, then you're automatically...so the \$500,000 doesn't mean anything because you still have the oversight review if you go...if you take any of that extra up to 12 cents or whatever. And so I guess what I'm reading, if I'm reading it right, that any amount of money that you ask for a building project is going to have to have oversight, it has a review.

SENATOR SCHELLPEPER: Um-hum.

SENATOR VRTISKA: I find that rather cumbersome from the standpoint of small projects that are going to be, that are going to be...

SENATOR SCHELLPEPER: Well, small, small projects, if you're not involving any school, don't have to be covered.

SENATOR VRTISKA: Well, I know, but I'm talking about if there...

SENATOR SCHELLPEPER: If there's a school involved. And if you're going to...because then you're going over the \$1.10 levy limit, which is set in LB 1114 last year.

SENATOR VRTISKA: I understand that, and that's what bothers me is because on the one hand you're saying it's \$500,000 or more, and on the other hand you're saying if you spend anything above you still have to go before the review commissions.

SENATOR SCHELLPEPER: It is because whether or not schools are involved or schools are not involved.

SENATOR VRTISKA: So even though you took the sidewalks out, you're actually putting them back in because if, if a school is going to build a sidewalk from one place to the other and it cost any amount of money...

SENATOR SCHELLPEPER: They can't...no, sidewalks don't...

PRESIDENT ROBAK: One minute.
